

# VOICE SENTRY

A Carefully Designed, Secure, and Highly Portable  
Audio Mask to Protect Your Sensitive Conversations

PREPRODUCTION RENDERING

The all-new Voice Sentry (VS-1) is a powerful, portable voice privacy device that deploys in seconds to provide single-point speech protection for vulnerable areas like doors, windows, and ducts. Via the external speaker output, the unit can drive an additional emitter for enhanced protection. With a built-in battery — and fast USB-C charging — the VS-1 is a must-have for travel teams as well as secure office and other working spaces. Remote activation is performed via optical remote control, providing the convenience of wireless operation without the security risks of RF-based wireless technologies.

## CAPABILITIES & FEATURES

- Secure speech mask to protect conversations
- Selectable equalization tailors mask to various surfaces
- Magnetic mount makes application and removal easy
- Optical remote for simple activation at a distance
- Internal battery allows unit to run for days

## PERFECT FOR

- Secure office spaces, SCIFs, temporary working areas
- Doctor's offices, medical centers, therapist offices
- Legal counseling, law offices, regulatory discussions
- Corporate environments, intellectual property, boardrooms
- VIP travel, vehicle discussions, hotel spaces
